

# Reference project: Logistic chain for automotive production supply

Client	Position	Duration	
<p>International automotive supplier (Tier 1; vehicle electrics)</p>	<p>Project manager</p>	<p>1,75 years</p>	<p>Hans-Peter Gartner</p> 
Problem			
<p>Just-in-sequence-supply with lotsize-1-parts for an automotive manufacturer in Zaragoza (Spain) as a new customer. Production of the parts in Tunesia; for that purpose establishment of a new production plant there and its supply with purchased parts mainly from Germany and neighbouring countries.</p>			
Task			
<p>All measures and steps that are necessary for the functioning of logistics (in the broadest sense) in this complete, newly established value chain and for a frictionless and successful SOP.</p>			
Result			
<p>Nearly seamless SOP; in compliance with the project costs as well as the costs for ongoing operations (series calculation).</p>
