

Interim and reference project 1

Supported COO automotive supplier (1 year)

Client	Role	Task	Duration
International automotive supplier of deep draw parts (Tier 1) Approx. 3,000 employees	Consulting, support and project management	Project manager for 14 efficiency projects	1 year
Challenge			
The plant had been severely impacted by the diesel affair; customer demand had changed dramatically. Efficiencies to save the plant and the plant results had to be confirmed by Controlling within a year.			
Task			
The 14 efficiency projects were drawn up by all plant managers and the implementation was monitored via stringent project management. Sub-projects were incorporated into the implementation. The impact progress was reported monthly via the control loop.			
Results			
The goal of generating > 1 million euros was exceeded.
